- Almost 90% of rents are CPI-linked which preserves the value of rent cashflows in an inflationary economic environment

APPENDIX

Buy and hold - strategy with proactive asset management and opportunistic capital recycling

1

Acquisition of high-yielding basic retail properties

- Initial yield averaging of 8-10% expected (by accepting shorter WALTs)
- Focusing on stable and established micro locations in the various cities in Germany
- Investing in grocery-anchored properties with highly creditworthy tenants
- More than 85% of rental income is CPI-linked
- High capital discipline is key in DKRs strategy
- Granular portfolio growth is a key driver of higher yields

2

Active asset management generates strong value creation

- Proactive and experienced team with high abilities to improve every single property
- Aim for lease prolongations
- Vacancy reduction by optimisation or repositioning of properties
- Ability to invest capex when it generates additional returns (lease prolongations, vacancy reductions, rent increases)

3

Strong balance sheet and REIT regime lead to low cost of capital and reliable dividends

- Conservative balance sheet and institutional set-up of the Company with access to national and international capital markets enable debt financing at attractive conditions
- Refinancing of existing properties regularly takes place at further reduced interest rates
- Recurring dividend from a risk averse equity story in a highly institutional REIT setting

4

Opportunistic sales of small portfolios with high profit returns

- Once properties have been improved DKR can bundle properties whose characteristics cannot be improved further into small portfolios to be sold off
- Selections can be offered to the market or institutional investors directly at very attractive yields
- Profit returns must be distributed as a dividend to the shareholders generally
- REIT structure obliges DKR to distribute profits from sales as a dividend, but 50% can be used for investments into new acquisitions as one source of financing

- Semi-professional market niche which DKR runs professionally
- Asset-wise acquisitions cheaper than portfolio deals

Accepting short WALTs

- DKR make use of the disproportionate decline in property prices compared to the decline in WALTs on the market
- Deep property analysis before acquisition

High-speed acquisition process

- DKR buys out of equity which is advantageous in the acquisition process
- Debt refinancing after acquisition

Value enhancing asset management

- **Synergies and stronger position** towards tenants
- Significant funding advantages on a portfolio basis
- **Tax exemption** due to REIT-Status

Capital recycling as sub-strategy to grow on its own

>> Investment criteria:

- Retail properties in established and stable micro locations and catchment areas in regional and mid-sized cities in Germany
- Retail tenants that supply goods and services for daily needs, like groceries etc.
- At least two non-cyclical anchor tenants
- Strong cashflow from the beginning based on high initial yields
- Properties with value-add potential
- Investment volume in a niche between 1m EUR and 25m EUR

>> Manage-to-sell strategy enables capital recycling:

- Acquisition in a downturn phase at high yields
- Accept high vacancy and short WALTs to obtain high yields
- Vacancy reduction and extension of rental contracts are inherent value add potential
- Opportunistic property sales after successful revitalisation and/or rent prolongations at low yields

Basic retail sector remains stable with best outlook
